Office Action Summary		10/656,00	2	REESE ET AL.				
		Examiner		Art Unit				
		Jason J. B		3752				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
 Responsive to communication(s) filed on This action is FINAL. 2b) ☐ This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. 								
Disposition of Claims								
 4) Claim(s) 1-20 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-9 and 12-20 is/are rejected. 7) Claim(s) 10 and 11 is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. 								
Application Papers								
9) ☐ The specification is objected to by the Examiner. 10) ☒ The drawing(s) filed on 09/05/2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.								
Priority under 35 U.S.C. § 119								
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3752

DETAILED ACTION

Drawings

The drawings are objected to because each individual drawing must have its own figure number. The first page of the drawings appears to contain two figures, but only one of them is labeled. On the same note, the label "FIG. 4" appears to represent three individual figures. In addition, each individual element must have its own reference number. For example, the reference number 412 in figure 4 appears to represent two different parts in the top figure and the middle figure. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3752

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the motor of claims 8 and 16, and the precision stage of claim 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is unclear as to how the movable portion of the substrate holder is able to translate in two dimensions relative to the fixed portion. It appears that the substrate holder is guided relative to the fixed portion by a track that only allows for movement in one dimension.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-7, 9,12-15, 17, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Wagener et al (4,262,991).

Wagener et al shows a precision travel staging system comprising a precision stage (base plate, not shown), a fixed portion (9) configured to be attached to the precision stage, a movable portion (1) operatively coupled to the fixed portion (9) and selectively movable relative thereto, a securing mechanism (object holder, not shown, column 2, line 6) configured to secure a substrate at a predetermined location relative to the moving portion (1) and an actuator mechanism (5,8) operative to provide movement of the movable portion (1) in one direction relative to the fixed portion. Regarding claims 4 and 12, the fixed portion (9) and the movable portion (1) both comprise an aperture

Art Unit: 3752

cooperating to form a window (figure 1, not labeled) in the substrate holder and the securing mechanism is operative to secure the substrate at a selected location relative to the window. With respect to claims 5-7 and 13-15, the staging system further includes an indexed reference system (shown on the movable portion 1, not labeled). The reference system comprises a pointer (shown on the movable portion 1, not labeled) and a plurality of reference indicia (shown on the movable portion 1, not labeled). With respect to the method claims 17, 19 and 20, the apparatus shown by Den Engelse et al is capable of performing the method or steps in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 8, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wagener et al (4,262,991) in view of Den Engelse et al (5,900,708).

Art Unit: 3752

Wagener et al shows all aspects of the applicant's invention as in claims 1 and 9, but does not include a motor or a spring biased securing mechanism. However, Den Engelse et al shows a substrate holder comprising a spring biased securing mechanism (50) used to secure the substrate to the stage and an actuator mechanism comprising a motor (34, 36). It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to substitute the securing mechanism (50) of Den Engelse et al for the securing mechanism (not shown) of Wagener et al in order to better secure the substrate to the movable stage 1. Additionally, it would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to include the actuator mechanism comprising a motor (34, 36) of Den Engelse et al in order to make the movable portion (1) move automatically. Regarding the method claim 18, the apparatus of Den Engelse et al as modified by Wagener et al is capable of performing the method or steps in the claim.

Allowable Subject Matter

Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kung et al (5,337,178) shows an optical microscope stage with

Application/Control Number: 10/656,002

Art Unit: 3752

an indexing mechanism. Kraft et al (4,946,266) shows a movable object holder for microscopes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason J. Boeckmann whose telephone number is (571) 272-2708. The examiner can normally be reached on 7:30 - 5:00 m-f, first Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Scherbel can be reached on (571) 272-4919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
